ProNet call for participants

Long term social project incubator for young entrepreneurs

6th to 13th of September 2014 in Praha, Czech Republic

24th to 31st of January 2015 in Cluj Napoca, Romania

18th to 25th of April 2015 in Bad Breisig, Germany

What is ProNet?

ProNet is a multidisciplinary project that brings together young entrepreneurs from Europe and supports them generating social sustainable projects in their own community.

During this year long project incubator you and your team, together with teams from other seven countries, will develop and implement a social project. During this process you will reach your maximum potential together with your team and gain knowledge, skills, attitude, tools and a network to make your project real and possible through social change.

On a long term basis, ProNet strives to create a community of social entrepreneurs that will serve as a platform of innovation and support in generating social impact.

How it will work?

Teams of three people from eight different countries will have the space and opportunity to develop personally and professionally during this year through three residential seminars, online and local level work.

With a non formal and experiential approach, and receiving feedback from peers and specialists in the business and third sector fields, the seminars will serve as tool to shape and refine the initiatives they will implement in their community.

In order to meet participants needs, ProNet will merge together participative workshops, panel discussions with experts, field visits and innovative methods that will bridge their ideas with their desired impact.

What will I need to pay?

This is a funded project, therefore 70% of your expenses will be covered and the money will be transferred to your bank account after each seminar. As we said in the description, we strive for creating sustainable project, therefore a fee of 100 euros per team will be paid in the beginning of the process, money that in the end will be returned with one condition: participants stay engaged until the end of the process and commit to the entire process.

How can I take part in ProNet?

We are looking for teams of three young people, 16 to 30 years old, who have an idea that will impact their community.

We are looking for proactive and open minded youth with a desire to bring change to their community and open to join an international network of people with the same interests.

When you fit this description and want to join us, please complete the following application form before **4th of August 2014** showing us your motivation.

Thank you and see you on board!
